

TECH-SPRAY® Hi-K

0-26-28

TECH-SPRAY Hi-K is one of those tools that our grower's like to keep a secret. Our grower's know that our easy-to-use solution mixes well with most tank mixes, and adding Hi-K to their mid to late season sprays reduces costs.

Want bigger nuts and better nut fill?

In these trials on almonds, we switched out the competitive Potassium product our grower uses with TECH-SPRAY Hi-K. **The results were bigger nuts, higher yield, and 12:1 Return On Investment.**

TECH-SPRAY Hi-K was applied during nut fill, 3 weeks apart at **rate of 3 qts/acre**
Crop: Nonpareil and Monterey almonds

TECH-SPRAY Hi-K was applied twice in April, Once in May and once in June at **rate of 2 qts/acre**
Crop: Nonpareil, Mission, almonds

Add 1- 4 quarts Hi-K per acre
for tree crops during mid to late season sprays
for best results and ROI.

All sprays were made with regularly scheduled sprays, so no additional application costs were incurred. Always read and follow label.
